

# WHAT IS A BACKLOG?

1

Artifact for transparency, inspection and adaptation

2

Ordered list of pending work items: user stories, tasks or any other activity related to the product

3

Can be managed with different criteria, such as DEEP

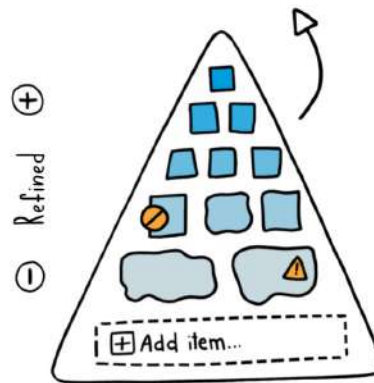

- Detailed
- Estimated
- Emergent
- Prioritized

## PRODUCT BACKLOG

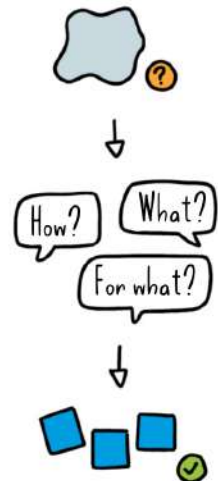

A tool for the **Product Owner** to manage value and pending work

### PRODUCT GOAL

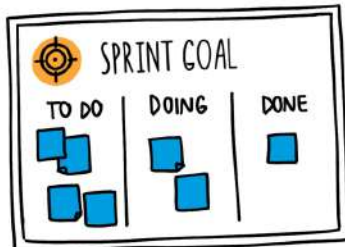

### REFINEMENT:

Oops, something is blocked!  
Our Scrum Master can help us.

Do you understand this User Story?  
No. Let's refine it. !??

This is not aligned with the Sprint Goal.  
Let's talk to our Product Owner.

I can't make progress in this...  
I can help you!

## SPRINT BACKLOG

A tool for the **Developers** to manage the work of the Sprint
